Mazak

INTRODUCING THE AUTOMATION RANGE

Mazak has a range of automation solutions designed for every machine-type and application. From robot machine tending through to our flagship PALLETECH system, we are leading the field in providing automation solutions that can dramatically improve machine utilisation, productivity and profitability.

GANTRY LOADER (GL)

High-speed workpiece transfer and loading / unloading make it possible to automate a machine over extended periods of time.

EZ LOADER

The robot system integrated with the collaborative robot enables easy setup without extensive robot knowledge.

PALLETECH SYSTEM

Industry-leading pallet system offering lights out machining for a wide range of machine tools.

We offer a range of service and after-sales support options, which can be configured to suit your needs, giving you a complete worry-free solution.
